**Teaching Schedule**

**Day 1 Friday**

**9:00 - 10:45**

class session 1.75hrs

**Introduction** - Levels of consideration before the normal process of Architectural design begins.

**How do we feel in our buildings**

**The building as a musical instrument**

**Resonant Frequency of buildings**

**What constitutes Healthy Space**

Architects are responsible for the health.

**The Consciousness of Buildings**

The correlation of People and the energetic atmosphere of their homes, land and environment. Case studies of personal health problems caused by 'bad' buildings and land.

**Ki (Energy) Signature and the Harmonic Code** and the architects influence

and responsibility on the energetic blueprint.

**New Build Scheme Design and Change of Use of existing buildings**

Does the land and/or building give permission for the project!

**Site Considerations** – honouring the site and reducing potential damage

to the earth spirit of the land

10:45 – 11:00

break tea coffee 15mins

11:00 - 1:00

class session 2hrs

### **Geomancy**

Exploring the psychic archaeology of a site, the guardian spirits.

### **Geopathic Stress and Sick Building Syndrome**

What underlies sickness in buildings emanating from the various types of earth energies. Black streams to avoid building over.

### **Geomantic Land Survey Mapping**

Locating the 'invisible' earth and atmospheric energies, both positive and negative to health aspects.

### **Considerations underlying Architectural Design:**

**Sacred Geometry** - The Golden Mean and other harmonic and geometric proportions and natural forms.

### **Preparation of the Site – before design begins**

#### **Blueprint of Past Activity**

The Environmental Psychology of Space.

We will explore case studies of the impact of past activities within Buildings, the Land and our ancestors that have left imprints resulting in detrimental consequences to health and emotional wellbeing on the current occupants.

We will see how events of past generations such as battle, trauma and even murder, have left scars deep in the psyche of the land, buildings and people. The ripple imprint effect left in the etheric matrix of space has consequences to life now and potentially to future generations unless brought to resolution.

Predecessor imprints, Paranormal Activity and other imbalanced energies affecting land and buildings.

### **Process of Resolution of old left-over scars on the land**

*Psychotherapeutic Regression - 'Space Clearing'*

## Feng Shui and Vastu Shastra

Fundamental principles of Chinese and Vedic (Indian) systems, both with over 5,000 years of a knowledge base. Simple but powerful introduction to principles which you can apply to your clients homes to enhance the areas of life which you wish to address including Health, Relationships, Wealth, Career etc.

1:00 – 2:00

Lunch

2:00 - 4:30

on the land session 2.5hrs

**Energy Mapping of Land – Locating building zones for most propitious health and wellbeing.**

Dowsing the Land with L-rods and our own bodily senses. Feeling the earth energies of different sites on the land. An introduction to the art of dowsing. Learning basic but powerful physical and energetic dowsing techniques for tuning into the energies of the land, natural forms, trees etc. in order to develop a greater relationship to your project landscapes and the earth.

4:30 – 7pm

free time, tea coffee

7pm - 8:30pm

Dinner

8:30pm – 9:30pm

Group share processing teaching module of the day's work 1hr

## Day 2 Saturday

9:00 - 10:45

class session 1.75hrs

**Awareness of other factors influencing quality of space. Introduction to:**

### **Yin/Yang**

Sensing the qualities of yin/yang feminine/masculine aspects of a building.

### **5-Elements**

Working with the physical and subtle elements of water, wood, fire, earth, metal. The nourishing and destructive cycles.

10:45 - 11:00

break tea coffee 15mins

11:00 - 1:00

in class on the land session 2hrs

### **Landscape Form School of Feng Shui**

The choice of site for a building will influence the holding power of the building(s). The traditional concept widely used in many cultures, mostly know in China, is what is called the 'Landscape Form School' of feng shui and looks at mountains, hills, streams and lakes etc.

### **Site exploration of the Landscape Form School of Feng Shui**

After looking at the principles involved, we will continuation the session by and experiencing various sites on the Land.

1:00 - 2:00

Lunch

2:00 - 4:15

class session 2.25hrs

### **Beyond 3D - The Invisible Energies**

Techniques to experience how to tune in and sense the invisible energies and the atmosphere of space in both buildings and the landscape

Left and Right Brain balance. As the left brain deals with manifesting a design at practical levels, the Right Brain of intuition and feeling, deals with the heart based intuitive aspect of sensing the 'invisible' elements of a site or existing building. See how these can be taken into account in the process of architectural design.

4:15 – 7pm free time, tea coffee

7pm - 8:30pm Dinner

8:30pm – 9:30pm Group share processing teaching module of the day's work 1hr

## Day 3 Sunday

9:00 - 10:45

On site and class session 1.75hrs

### **Designing a House using the workshop principles**

Taking an actual site on the land, we will use all the knowledge we have gained and go through the process for designing a new building.

10:45 - 11:00

break tea coffee 15mins

11:00 - 1:00

class session 2hrs

### **The resonance of Materials and their Health Values**

#### **Toxic Materials in common use!**

The vibrational qualities of healthy and toxic materials. Learn how to sense these and how we feel holding them.

#### **Kinesiology for testing the effects on our personal energy fields**

Certain materials will deplete our personal energy fields and some will enhance. We look at simple ways to test these using kinesiology.

#### **Electromagnetic Considerations**

Checks and solutions to design out and reduce negative harmful energies affecting the land and buildings from electrical equipment such as nearby power lines or from objects within the home such as transformers, televisions, computers, clock radios, electrical wiring, cell phones etc.

1:00 - 2:00

Lunch

2:00 - 4:00

class session 2hrs

### **CONSTRUCTION PHASE**

#### **Groundbreaking and other Ceremonies**

Honouring the land and setting a precedent of right approach for the design and construction work to begin – an ancient tradition.

### **The Building Process**

Various ceremonies carried out throughout the entire construction process will ensure maximum benefits over and above the professional architectural services. Energy clearing and harmonizing throughout the construction process ensures the highest levels of chi and thus wellbeing for the entire project team.

### **Architect holding the Vision of a Building – not just a project manager Role**

By holding the vision of the original design concept in mind, the energetic fields containing the memory of the completed building is kept within the highest potential for success of the construction phase. This enables the construction process to proceed at its greatest efficiency throughout every level and trades.

## **COMMISSIONING PHASE**

### **Activating the Energy Fields**

The Etheric Geometric Energy Fields of a building must be activated to achieve it's full potential by energizing the molecular structures. Happy Molecules!

### **Tuning the Building like a musical instrument**

Tuning up the building and maintaining the highest level of vibration and clarity of purpose and efficient running at the energetic level. Like a musical instrument. Etheric fields are geometrical in nature and the correct alignment of these fields will enable smoother flows of energy within the physical and etheric structure.

### **The End Product**

**A Happy Building serving the highest physical and spiritual needs of its residents.**
